Robot cells.
Customised turnkey automation solutions.

Robot cells are compact automation cells for a variety of tasks including loading, palletising, depalletising, pick-and-place, bin picking, and more. Our expertise in robotics is based on the many years of experience we have gained in complex system solutions in process automation. With this foundation, we customise client-specific robot cells and integrate them on a turnkey basis. JAG robot cells offer you all the advantages of robotics. They increase efficiency and reduce production and staff costs by automating repetitive manual tasks and increasing their speed.

Opportunities and advantages

From a delicate, precise grip for bin picking through to swift assembly processes, JAG robot cells work incredibly quickly with great repeat accuracy.

» Increase quality with mechanical precision
» Increase productivity with higher speeds
» Change with no interruption to operations
» Intuitive operation via self-explanatory HMI solutions
